EXPERIMENT - 8

User Management and Role-Based Access Control in Zoho Creator

Library Book Issue Management

Application Name	Library Book Issue Management
Form Name	Book_Issue_Request_Form
Report Name	Book_Issue_Request_Report
Student Name	AJAY K
Student Roll No.	241401006
Experiment	8
Platform	Zoho Creator
Record Date	23 October 2026

Lab Record	Configuration of Library Admin, Library Staff and Library Member roles and permissions, with demo-user tests.

241401006

Department of Computer Science and Business Systems

Rajalakshmi Engineering College

1. Objective

To configure role-based access control so administrators manage library data, staff process requests, and members submit and view only permitted records.

2. User Groups and Responsibilities

Role	Responsibility
Library Admin	Manage library records, reports and dashboard.
Library Staff	Review requests, update processing status and notes, use reports and dashboard.
Library Member	Submit a book issue request and view permitted own records only.

3. Roles and Permission Profiles

Write here, in your own words, the roles and permission profiles you created and the hierarchy you set (including whether peer sharing is on or off).

4. Record and Field Protection

Write here which fields you restricted (for example Staff_Notes, Confirmation_Sent, Request_Status) and for which role, and how Members are limited to their own records.

241401006

5. Permission Matrix

Capability	Library Admin	Library Staff	Library Member
Submit request			
Main report			
Pending / Available reports			
Edit requests			
Delete requests			
Dashboard			
Request_Status			
Staff_Notes			
Confirmation_Sent			
Import / export / API			
Design / account admin			

Fill each cell from the permissions you actually set (Allowed / Not granted / Read-only / Hidden).

6. Configuration Procedure

1. *Describe the step you performed.*
2. *Describe the step you performed.*
3. *Describe the step you performed.*
4. *Describe the step you performed.*
5. *Describe the step you performed.*
6. *Describe the step you performed.*

241401006

7. Role-Test Results

Describe how the tests were done (for example Development View as demo users) and what that does and does not prove.

Identity / test	Observed result	Status
Member - submit and view own request		
Second Member - sees only own record		
Member restrictions		
Member dashboard		
Staff - view all and process request		
Staff restrictions		
Staff dashboard / queue		
Admin - records, dashboard, edit/delete controls		
Member initialization (status = Pending)		

8. Real-Account Assignment Status

State which real accounts (if any) you assigned roles to and whether a real login test was done.

10. Procedure for Remaining Real-Login Test

List any real separate-account checks you still need to do, or write 'Not applicable'.

11. Expected Learning Outcomes

- Distinguish roles, permission profiles and business member categories.
- Apply least-privilege access to forms, reports and internal fields.
- Verify record isolation using two Member simulations.
- Distinguish demo-user simulation from actual separate-account login testing.

12. Result

Summarise what you configured and what your tests showed.

Conclusion

Write your conclusion here.
