EXPERIMENT - 9

AI-Assisted Features and Built-in Analytics

Library Book Issue Management

Student Name	AJAY K
Register / Roll No.	241401006
Subject	Low-Code Application Development using Zoho Creator
Application	Library Book Issue Management
Platform	Zoho Creator
Record Date	23 October 2026

241401006

Aim

To explore AI-assisted features available in Zoho Creator and use built-in analytics to summarize library requests, while verifying numerical results against the source data.

Experiment overview

Write a one-line overview of what you explored in your own account.

Department of Computer Science and Business Systems

Rajalakshmi Engineering College

1. Scope and Prerequisites

Describe what data your analytics used and what was out of scope.

2. Zia Features Explored

Feature	Potential library use	Observed / evaluated
Build Agent and Create Form	Suggest a draft form or app structure from requirements.	
Next Field Suggestions	Suggest related fields during form design.	
Deluge Assistance	Help explain or draft validation logic.	
Deluge Zia Task / agents	Natural-language assistance in a workflow.	
Prediction	Estimate a result from historical labelled records.	

Add what you actually saw in your account, and whether any prompt was run.

3. Responsible Use

Use synthetic examples for learning, review suggested fields and scripts, and test invalid inputs before accepting generated logic. Do not provide passwords, connection tokens or unnecessary member contact details in prompts.

241401006

4. Analytics Setup and Procedure

1. *Describe the step you performed.*
2. *Describe the step you performed.*
3. *Describe the step you performed.*
4. *Describe the step you performed.*
5. *Describe the step you performed.*
6. *Describe the step you performed.*

5. Expected and Observed Counts

Member type	Source records	Share of requests
Faculty		
Staff		
Student		
Total		

Fill from your own data and check the chart against the source records.

6. Interpretation

Write your interpretation here.

7. Verification and Limitations

Check	Result
Zia provider and feature list	
Analytics integration	
Chart aggregation	
Creator chart persistence	
AI-generated output	
Prediction model	
Production release	

8. Result

Summarise what you explored, configured and verified.
